

PX™ 5.3

X-ray Inspection System

Security & Detection Systems

Designed to screen small and medium-sized objects such as briefcases, backpacks, parcels, and packages, the PX-5.3 is an X-ray screening solution for mailrooms, schools, courthouses, corrections facilities, corporate offices, cruise ships, and other space-constrained environments. Take advantage of outstanding detection, performance, and reliability in a compact, portable design.

High-Performance Imaging

L-3's PX 5.3 provides powerful imaging and clarity in a compact X-ray screening system so you can spot threats and contraband.

- A full complement of image-enhancement tools make it easy to generate precise, detailed images for maximum detection capability.
- "Slide and See" continuous contrast adjustment lets you see the smallest details, regardless of density.
- Best Image First™ feature automatically selects and presents the optimal view, reducing the need for manual adjustments
- L-3's TRI-MAT imaging helps operators easily distinguish between organic and inorganic materials

Configurable for a Range of Environments

Easy-to-configure software controls let you adapt to diverse environments and evolving security challenges.

- Short and long conveyor lengths to accommodate varied footprints
- Bi-directional operation for two-way screening for locations needing entry and exit screening (e.g. prisons or businesses with high theft potential)
- Customizable image archive stores up to 20,000 images

Easy Operation

L-3's interface and multi-language support make it easy to control the system and make the most of imaging information.

- Simple three-button conveyor control and touch sensitive pad enable continuous heads-up operation with icons on the viewing screen
- Ergonomic console minimizes operator fatigue and physical stress of prolonged screening.
- Threat Image Projection (TIP) option periodically inserts fictitious threat images, enabling supervisors to train screeners and assess effectiveness
- EU-approved TIP image libraries
